Summary

Ecommerce and digital optimisation specialist with 10+ years turning customer behaviour, data and experimentation into measurable conversion and revenue growth — across Shopify retail, subscription apps and sport.

I work at the intersection of customer experience, ecommerce trading and CRO: mining analytics and customer insight to find friction, running structured test programs, and improving search, navigation and product discovery so people find the right thing faster. I've rebuilt full customer journeys end-to-end and lifted conversion, order value and lead generation across every role — and I care as much about why customers behave the way they do as about the numbers themselves.

Beyond work I'm an outdoors person and dad who grew up on the NSW South Coast — most of my free time goes to the ocean, the golf course and getting my kids into wild places. Patagonia's belief that business can be a force to protect our home planet is exactly the kind of purpose I want my work pointed at.

Targeted fit for this role

- **Ecommerce & Digital Optimisation:** 10+ years in ecommerce and digital optimisation — owning conversion, trading performance and the customer journey across Shopify retail, a subscription app and client stores.
- **Experimentation Programs:** Run structured test-and-learn programs — hypotheses, A/B and multivariate tests, funnel and message experiments — turning results into continuous, measurable improvement rather than one-off wins.
- **Search, Navigation & Product Discovery:** Improved on-site search, navigation, category and product-page experiences so customers find the right products faster, lifting engagement and conversion.
- **Analytical Thinking & Insight:** Use GA4, BigQuery, Segment and CRO tooling to uncover opportunities, test hypotheses and translate behavioural data into practical recommendations — data into decisions, not just dashboards.
- **Shopify & Analytics Tooling:** Hands-on with Shopify (theme, catalogue, checkout and app ecosystem) plus GA4, Klaviyo, Segment and experimentation tools — the core optimisation stack this role runs on.
- **UX & Seamless Journeys:** Deliver intuitive, mobile-first, accessible journeys as standard — grounded in usability testing, session analysis and behavioural data across web and app.
- **Cross-Functional Partnerships:** Build strong relationships across ecommerce, marketing, merchandising and development partners — aligning teams around customer experience and commercial outcomes.

- **Self-Directed Delivery:** Comfortable managing competing priorities and moving projects forward with minimal supervision — a habit built running my own consultancy and a lean in-house function.
- **Continuous Improvement:** Naturally curious and happy to challenge convention when there's a better outcome for the customer — I treat “good enough” as a starting point, not a finish line.

Core skills

Conversion rate optimisation (CRO) | A/B & multivariate testing | Experimentation strategy | Ecommerce (Shopify) | Customer journey optimisation | Search, navigation & product discovery | UX & usability testing | Google Analytics / GA4 | BigQuery & Segment | Klaviyo & lifecycle marketing | Behavioural & funnel analysis | Personalisation | Reporting & dashboards | Cross-functional collaboration | AI workflows

Platforms and tools

AI-first workflow: I use AI to speed up customer insight analysis, hypothesis generation, experiment design, content production, documentation and reporting.

Core stack: Shopify, GA4, BigQuery, Segment, Firebase, Klaviyo, Salesforce, Hubspot, Figma, and experimentation/CRO tooling, plus Claude and OpenAI.

Experience

User Growth Lead - Acquisition, Conversion & Lifecycle | [GolfTrak](#)

Jan 2026 - Present

Computer-vision golf app on a subscription model. I own acquisition, onboarding, conversion, lifecycle and content across app, website, customer portal, app store and email.

- **Conversion Optimisation:** Improved subscription conversion through onboarding, funnel and value-communication experiments — testing messaging, sequencing and pricing presentation.
- **Experimentation & Growth:** Grew users an average of 22% month-on-month and cut acquisition cost 25% through structured acquisition testing and creative iteration.
- **Behavioural Analysis:** Used GA4, Firebase, Segment and BigQuery to analyse behaviour, build dashboards and turn usage patterns into product and journey improvements.
- **Personalisation:** Segmented and personalised onboarding and lifecycle touchpoints by activity, trial status and support signals to lift conversion at each stage.
- **Content & Discovery:** Improved website, app-store and onboarding content by mining reviews, support conversations and usage data — making the right value clearer, sooner.

Founder - Ecommerce, CRO & Automation | [Chat Response](#)

Feb 2015 - Jul 2023

A consultancy I founded helping ecommerce, sport and startup brands improve customer journeys, conversion and revenue.

- **Full Journey Rebuild:** Rebuilt the end-to-end customer journey for 24/7 Golf, a high-value ecommerce retailer — unifying store, Klaviyo, lead scoring and Salesforce into one automated funnel that educated customers long before a salesperson stepped in.
- **Measured Optimisation Wins:** Lifted lead generation 78%, time on site 233% and salesperson conversion 150% through right-time, behaviour-triggered communications and funnel testing.

- **Conversion & AOV:** Improved sales conversion 23% and average order value 27% on \$3K+ equipment through better enquiry capture, follow-up and customer education.
- **Revenue Campaigns:** Generated \$70K+ in campaign revenue for The Masque Co. through targeted, segmented ecommerce campaigns.
- **Partner Management:** Worked directly with founders, marketing teams, developers and platform vendors to prioritise and deliver within lean budgets.

Product Owner - iOS Mobile App | [GolfTrak](#)

Aug 2023 - Feb 2026

Owned product for GolfTrak from pre-launch through public release, with a strong focus on conversion and the mobile experience.

- **Product & Conversion:** Took a product six years in development to public launch and 20,000+ downloads in six months, optimising onboarding and trial conversion throughout.
- **Mobile-First UX:** Led agile delivery of a mobile-first product across roadmap, UX, sprint delivery, release coordination and testing.
- **Monetisation:** Introduced subscription and in-app purchase systems, reaching 30% free-trial adoption and 15% subscriber retention after trial.

Digital Media Manager | [Melbourne Storm](#)

Sep 2011 - May 2014

One of Australia's leading NRL clubs. I built the club's first digital media function across web, social, video, email and mobile.

- **Audience Growth:** Increased average monthly website audience 29% and video views 61% through content, UX and channel optimisation.
- **Revenue Growth:** Shifted the function from a cost centre to a revenue-generating one through branded content and digital partnerships.
- **Stakeholder Management:** Worked across media, commercial, membership, football and community teams to deliver integrated digital campaigns.

Education

Bachelor of Sports Administration - Victoria University

Sports Management Semester Abroad - San Jose State University
