Includes work, product examples and case studies.

Summary

Product and software leader with 12+ years across mobile apps, web platforms, data and analytics products, and sport; owning strategy, roadmap, requirements and delivery from concept through release and into sunset. I'm outcome-led rather than output-led: I start from the problem or opportunity worth solving, then work back to the roadmap, not the other way around.

I currently lead product and growth for GolfTrak, a computer-vision golf app, where I own the product register across two iOS apps, a web platform and a customer portal - setting roadmap direction, writing requirements, running delivery with engineering and design, and signing off releases. Before that I built Melbourne Storm's first digital department and spent eight years leading client product and platform builds. I'm technical enough to sit in the detail with developers, and commercial enough to translate that back to stakeholders and customers.

Targeted fit for this role

- **Product & Software Lifecycle:** Managed the full lifecycle across mobile, web and data products - discovery, business requirements, functional specifications, sprint delivery, QA coordination, release and post-launch performance.
- **Strategy & Roadmaps:** Defined product strategy and roadmaps around opportunities and evidence rather than stakeholder requests - prioritising by customer value, technical effort and measurable business outcome.
- **Product Register & Sunset:** Maintain a whole-of-business view across apps, web platforms, integrations and tooling - assessing what to invest in, consolidate or retire, including rationalising legacy features and platforms through an acquisition.
- **Market & Competitor Research:** Specify product requirements from market research, competitor analysis, customer interviews, review mining and usage data - and act as the internal reference point on competing products.
- **Technical Background:** Hands-on across iOS release processes, APIs and integrations, analytics infrastructure (BigQuery, Segment, GA4, Firebase), web builds and AI-assisted tooling - I write specs developers can build from and prototypes to prove a concept.
- **Leading Product People:** Led multidisciplinary teams of up to seven across product, design, content and marketing, and built a department from one to four and a half staff - recruiting, onboarding and setting delivery standards.
- **Cross-Functional Relationships:** Work daily across technology, operations, commercial and leadership, plus external partners, agencies and customers - agreeing scope, vision and priorities where those groups pull in different directions.
- **Sport, Analytics & Broadcast Media:** Sports-tech and broadcast media background across GolfTrak's computer-vision performance data and Melbourne Storm's digital, video and match-day platforms - familiar with how clubs, media partners and fans consume sports data.

- **Product Demos & Messaging:** Regular product super user - running demos for customers, partners and stakeholders, and owning positioning, messaging and launch content for new releases.

Core skills

Product strategy | Roadmap planning | Business & functional requirements | Product lifecycle management | Software delivery | Agile & sprint delivery | Release management | Market & competitor research | Product discovery | Stakeholder management | Team leadership | Vendor & partner management | Data & analytics products | Commercial alignment | Product positioning | Documentation | AI workflows

Platforms and tools

AI-first workflow: I use AI to speed up research, requirements drafting, customer insight analysis, documentation, prototyping and delivery planning - including building internal tools and automations.

Core stack: Jira, Asana, Confluence, Figma, GitHub, App Store Connect, TestFlight, BigQuery, GA4, Segment, Firebase, App Figures, Salesforce, Hubspot, Klaviyo, Shopify, Claude and OpenAI.

Experience

User Growth Lead - Product, Acquisition & Lifecycle | [GolfTrak](#)

Jan 2026 - Present

Computer-vision golf app on a subscription model, acquired by ChipIn in 2026. I own the product and growth portfolio across two apps, the website, customer portal and lifecycle systems.

- **Product Portfolio:** Maintain the register of products, platforms and integrations across the business, recommending where to invest, consolidate or retire following the acquisition.
- **Roadmap Ownership:** Set and defend roadmap priorities against commercial goals - framing initiatives around the outcome they need to move rather than a fixed feature list, then translating them into scoped, sequenced work for engineering.
- **Customer Insight to Requirements:** Turn reviews, support conversations, interviews and usage data into product requirements and onboarding improvements that lift activation and conversion.
- **Growth Results:** Grew users an average of 22% month-on-month and cut CPI 25% through acquisition testing, messaging changes and creator-led campaigns.
- **Analytics Infrastructure:** Built reporting across BigQuery, Segment, Firebase and GA4 - including a custom analytics dashboard and an AI assistant giving the team self-serve access to app performance data.

Product Owner - iOS Mobile App | [GolfTrak](#)

Aug 2023 - Feb 2026

Owned product for GolfTrak from pre-launch through public release and into a subscription business.

- **Product Launch:** Took a product six years in development through public launch to 20,000+ downloads within six months.

- **Requirements & Specifications:** Produced business requirements and functional specifications with development team leaders, and owned intake and prioritisation across engineering, design, marketing, support, leadership and external partners.
- **Delivery & Signoff:** Ran agile delivery across roadmap, scope, user stories, sprints, release coordination and testing - and managed acceptance and signoff of delivery.
- **Monetisation:** Introduced subscription and in-app purchase systems, reaching 30% free-trial adoption and 15% subscriber retention after trial.
- **Technical Judgement:** Worked directly with developers to surface delivery risk, resolve technical constraints and trade customer value against effort and capacity.
- **Team Leadership:** Managed a multidisciplinary team of up to seven across product, design, content, marketing and customer experience.

Founder - Product, Growth & Automation | [Chat Response](#)

Feb 2015 - Jul 2023

A consultancy I founded building digital products, funnels and automation for ecommerce, sport and startup clients.

- **End-to-End Delivery:** Ran projects from client brief through scoping, build, launch, testing and reporting - managing contractors, suppliers and client stakeholders throughout.
- **Commercial Outcomes:** Lifted lead generation 78% for 24/7 Golf, improved sales conversion 23%, and generated \$70K+ in campaign revenue for The Masque Co.
- **Solution Design:** Translated ambiguous client problems into specifications, integrations and automated systems that non-technical teams could operate.
- **Capacity Planning:** Built and managed a contractor network, scoping cost and capability into proposals to deliver reliably on lean budgets.

Digital Media Manager | [Melbourne Storm](#)

Sep 2011 - May 2014

One of Australia's leading NRL clubs. I established and led the club's first digital media function across web, social, video, email and mobile.

- **Platform Ownership:** Owned the club's digital platforms end to end, including website rebuilds, mobile and match-day products, working with technology vendors and the NRL's central digital team.
- **Department Build:** Grew the function from one to four and a half staff, recruiting and onboarding permanent and casual roles as demand grew.
- **Audience & Revenue:** Increased average monthly website audience 29% and video views 61%, and shifted the department from a cost centre to a revenue-generating function through branded content and digital sponsorship.
- **Stakeholder Management:** Balanced media, commercial, membership, football and fan-engagement priorities against live match-day demands and breaking news.

Education

Bachelor of Sports Administration - Victoria University

Sports Management Semester Abroad - San Jose State University
